Master Defect Tracking Register (PTW-024 to PTW-071)

Defect ID	Module	Issue Summary	Expected Result	Priority	Status
PTW-024	Notifications	Opening a notification record results in a 404 error	The selected notification record should open successfully without a 404 error	P1	Open
PTW-025	Notifications	Opening a notification automatically marks it as Read	Notification should be marked as read only according to defined read/unread behavior	P2	Open
PTW-026	Platform Admin – Permit Creation	Platform Admin has Create Permit option, but clicking Next shows Access Denied	If option is displayed, Admin should be able to proceed or option should be hidden	P1	Open
PTW-027	Employee Management	Back button is missing in form/details view	A Back button should be available for clean navigation	P2	Open
PTW-028	Employee Management – Email	Email field accepts numerical-only values & allows invalid email	Strict RFC 5322 email regex validation must be enforced before submission	P1	Open
PTW-029	Employee Management – Phone	Phone field accepts alphabetic characters and allows creation	Phone field must accept valid phone digits only and reject alphabetic characters	P1	Open
PTW-030	Employee Management – Validation	Missing Department error displays raw SQL: invalid input syntax for type uuid	User-friendly message (“Please select a Department”) must display instead of SQL error	P1	Open

Defect ID	Module	Issue Summary	Expected Result	Priority	Status
PTW-031	Contractor Management	Contractor can be created without Email ID, Agency, and Department	Mandatory field validation must block submission until all required fields are filled	P1	Open
PTW-032	Contractor Management – Email	Email field accepts numerical-only values and allows invalid email	Strict email format validation must be enforced	P1	Open
PTW-033	Contractor Management – Name	Contractor Name field has no restriction on valid name input	Name field should enforce alphabetic/string character validation rules	P2	Open
PTW-034	Notifications	No notification count badge showing number of new/unread notifications	Top navigation and bell icon should display a live count/badge of unread items	P2	Open
PTW-035	Employee/Contractor/Agency – Phone	Phone number lacks predefined country code & 10-digit format restriction	Provide country code selector and enforce standard 10-digit phone format	P2	Open
PTW-036	Workforce Directory	Delete option is not available for workforce directory records	Authorized administrators should have a Delete/Soft-Delete option	P1/P2	Open
PTW-037	Certificate Management	Created certificate cannot be opened/viewed	Authorized users should be able to preview and view certificate documents	P1	Open
PTW-038	User Role Management	No notification sent after assigning a User Role	System should dispatch an email/app notification to the user upon role assignment	P1/P2	Open
PTW-039	User Role Management	Purpose and permissions of assigned role are not clearly communicated	Role details modal/tooltip should explain role capabilities and security scope	P2	Open

Defect ID	Module	Issue Summary	Expected Result	Priority	Status
PTW-040	Workforce Directory	Phone number is not displayed in the Workforce Directory list	Workforce Directory table should include a contact phone column	P2	Open
PTW-041	Employee Management	Employee details cannot be edited after initial creation	Authorized users should be able to edit and update employee details	P1/P2	Open
PTW-042	Location Management	Location can be created without filling all required details	Form must validate and require all mandatory location fields prior to submission	P1	Open
PTW-043	Competencies – Workforce Member	Workforce Member dropdown does not display available members	Dropdown must populate active workforce members for competency linkage	P1	Open
PTW-044	Competencies – Certificate	Certificate is not displayed when selecting/opening a competency	Associated certificate details and attachment must be rendered correctly	P1/P2	Open
PTW-045	Certificate Management – Start Date	Certificate has Expiry Date but no Start / Issue Date field	Certificate model and form should capture both Start Date and Expiry Date	P2	Open
PTW-046	Certificate List	Certificate list table lacks Workforce Member and Expiry Date columns	Certificate table must display assigned Workforce Member name and Expiry Date	P2	Open
PTW-047	Certification	Back button is missing in certification workflow views	A standard Back/Cancel navigation button should be present	P2	Open

Defect ID	Module	Issue Summary	Expected Result	Priority	Status
PTW-048	Competencies – Name/Description	Name and Description accept numerical-only input without validation	Name/Description should enforce valid character length and text formatting	P2	Open
PTW-049	Competencies – Validation	Incorrect/vague warning displayed when Workforce Member is not selected	Clear validation error: “Workforce Member selection is required”	P1/P2	Open
PTW-050	Workforce Management	Competency records do not have a Delete option; only Archive is available	Provide an explicit Delete option for competency records where permitted	P2	Open
PTW-051	Workforce Management	No clear Delete option available for complete workforce management records	Provide authorized users with Delete/Decommission capability	P2	Open
PTW-052	Billing	Quantity field allows record saving without entering a value	Quantity must be mandatory, positive integer, and validated before save	P1/P2	Open
PTW-053	Billing – Permit Metrics	Duplicate “Active Permit” metrics displayed with unclear meaning	Ensure each dashboard metric has a distinct KPI definition and label	P2	Open
PTW-054	Billing / Subscription	Usage information is displayed even though there is no active subscription	Usage counters should reflect actual subscription state and not show dummy stats	P2	Open
PTW-055	Subscription Management	Displays “Choose Plan”, but underneath shows “No active plans available”	Available plans must load correctly, or an empty state CTA should guide the admin	P1/P2	Open
PTW-056	Contractor/Agency Management	Edit option unavailable for Employee, Contractor, and Agency records	Authorized users must be able to update phone, email, and metadata	P1/P2	Open

Defect ID	Module	Issue Summary	Expected Result	Priority	Status
PTW-057	Incident Management	Back button is missing in the Incident module forms	A Back button should be present across all incident creation/view pages	P2	Open
PTW-058	Incident Management	Submitting incident shows error: Validation failed – UUID is expired	Incident must generate valid RFC-compliant UUIDs without unhandled expiration	P1	Open
PTW-059	Incident Management – Reporting	Clicking Report Incident without input lacks field-level validation	Display inline red validation errors for all required incident report fields	P1	Open
PTW-060	Permit Creation	Permit can be submitted without selecting Department and PPE items	Department and PPE selection must be strictly mandatory before permit submission	P1	Open
PTW-061	Permit Approval – HOD Notification	HOD does not receive notification when permit requires HOD approval	Backend must dispatch email/in-app alert to Department HOD upon permit submit	P1	Open
PTW-062	Permit Approval – Comments	In Dark Mode, typed text in approval comment field is invisible (black on dark)	Comment textarea text color must adhere to theme styling with high contrast	P2	Open
PTW-063	Platform Admin – Notifications	Platform Admin receives no notifications for permit creation or HOD approvals	System should dispatch configured event alerts to Platform Administrators	P1/P2	Open
PTW-064	Incident Approval – HOD Notification	HOD receives no notification when created incident requires approval	Backend trigger must notify designated HOD immediately upon incident filing	P1	Open

Defect ID	Module	Issue Summary	Expected Result	Priority	Status
PTW-065	Incident – Root Cause	Clicking Root Cause does not open expected Create/Add modal	Open modal/drawer to allow investigators to record Root Cause analysis	P1/P2	Open
PTW-066	Incident – Corrective Action	After adding Corrective Action, no toast/confirmation is displayed	Provide success feedback and update table state immediately	P2	Open
PTW-067	Incident – Preventive Action	Preventive Action section lacks Add/Manage action button	Provide Add/Edit/Manage controls for Preventive Actions	P1/P2	Open
PTW-068	Incident – Action History	No Delete option available for Root Cause, Corrective, or Preventive items	Allow authorized investigators to delete/retract incorrectly entered items	P2	Open
PTW-069	Incident – Reminder	Reminder function lacks clear instructions and displays ambiguous context	Provide contextual labels, trigger frequency settings, and clear tooltips	P2	Open
PTW-070	Incident – HOD Decision	Incident shows “Pending HOD Decision” but HOD has no decision interface	Provide Approve / Reject / Request Info action bar for the authorized HOD	P1	Open
PTW-071	Incident Investigation	Root Cause, Corrective, & Preventive fields accept numerical-only input	Apply validation requiring meaningful textual descriptions (min length / format)	P2	Open
